1. INTRODUCTION

The “Build Your Own Portfolio Site” project involves designing and developing a personal portfolio website using HTML, CSS, and optional JavaScript.

The main objective of this project is to create a professional online presence that showcases personal skills, projects, resume, and contact information in a clean and responsive layout.

2. OBJECTIVES

To design a professional portfolio website

To apply HTML and CSS layout techniques

To implement responsive web design principles

To add smooth scrolling and animations using JavaScript

To enhance user experience with hover effects

To deploy the website online (Bonus)

3. TECHNOLOGIES USED

HTML5 – Website structure

CSS3 – Styling, layout, responsiveness, animations

JavaScript – Smooth scrolling and interactive features

GitHub Pages / Netlify – Deployment (Bonus)

4. WEBSITE STRUCTURE

The portfolio website contains the following sections:

1. Home Section

Introduction message

Navigation bar

2. About Section

Personal background

Education details

Career goals

3. Skills Section

Programming languages

Technical skills

Tools and technologies

4. Projects Section

Completed projects

Project descriptions

Project links

5. Resume Section

Downloadable resume in PDF format

6. Contact Section

Email address

Phone number

Social media links

5. FEATURES IMPLEMENTED

Clean and modern design

Fully responsive layout (Mobile, Tablet, Desktop)

Smooth scroll navigation

Hover effects on buttons and project cards

CSS animations and transitions

Organized and structured content

6. RESPONSIVE DESIGN

The website uses:

CSS Flexbox and Grid

Media queries for different screen sizes

Flexible images and scalable text

This ensures proper display on all devices.

7. BONUS: DEPLOYMENT

The portfolio website can be deployed using:

GitHub Pages

Upload project to GitHub repository

Go to Settings → Pages

Select branch (main)

Save and get live URL

OR Netlify

Go to netlify.com

Drag and drop project folder

Get instant live website link

Deployment allows the website to be accessed online.

8. CHALLENGES FACED

Designing a clean and professional layout

Making the website fully responsive

Implementing smooth scrolling

Maintaining consistent styling

These challenges were solved through proper CSS structuring and JavaScript implementation.

9. LEARNING OUTCOMES

Through this project, the following skills were developed:

Front-end web development

Responsive web design

UI/UX design principles

JavaScript DOM manipulation

Website deployment process

10. CONCLUSION

The Portfolio Website project successfully demonstrates the ability to design and develop a responsive and interactive personal website using modern web technologies.

It provides a strong foundation in front-end development and helps in building a professional online identity.
